

Unleashing the Potential of the Human Genome

The human genome is so wonderfully created. Right from the beginning of the life of an individual creature; the genetic code is operated like a highly complex circuitry system. Each one of the thousands of genes has to be turned on or off with exquisite precision. The phenomenal precision ensures that all the genes are expressed at the right time and in the right quantity to so as to regulate and orchestrate the complex processes of forming a new creature—flawlessly!

Given the intricate mode of operation of the genome it begs the question, how does it receive intelligence to build, guide and preserve it? Recent scientific studies indicate that our genome is subject to intelligence transmitted through quantum signals. Our DNA act like antenna, receptive to quantum signals. Therefore, **quantum signals from God, a Higher Intelligence; design, instruct the construction, guide the operation and preserve the integrity of the genome.** Given the metaphysical nature of quantum signals, the metaphysical human soul is the conduit for these signals.

Unfortunately, negativity stored in our minds forms a receptor for rogue quantum signals. These **rogue signals can disrupt the operations of the genome, causing disease.** The negativity also causes chronic stress which amplifies the rogue signals. In this condition, one would bear chronic stress whether expressed or suppressed— disrupts human physiological operations. It negatively alters the biochemical environment in the body, leading to mutations in the genetic code. Some mutations can lead to serious, chronic diseases including cancer, and autoimmunity. In addition, these rogue signals may hamper the overall genome functional capacity in promoting and sustaining good health.

In our unique approach to unleash the potential of your genome; we recognize the importance of dissolving the underlying negativity, stress or trauma. We assist you in your journey to effectively resolve ongoing or underlying remnants of stress. When stress is consistently resolved, rogue signals will no longer have a receptor within you. It is so because **when the soul is properly aligned with your God-given Conscience, then it becomes solely receptive to authentic quantum signals. The authentic signals would preserve the genome's fidelity, integrity, accuracy, and optimal function.** In this optimal state, the genome regains its' innate infinite potential as a resource for repairing, healing, and even adaptation to some environmental changes including the emerging threats of toxins in the food, air and water.
